Criminal Record Search

1. It is the policy of the Board that students be provided with a safe and secure environment and that they be free from negative influences.
2. Toward this end it will avoid employing or engaging persons who have a history of criminal activity of a nature that could threaten the safety of students. Criminal activities of concern would include, but not necessarily be limited to, violence, involvement with illicit drugs, and sexual abuse.
3. New employees, and volunteers as determined by Board regulation, are required to provide for a criminal record check by a law enforcement agency.
