

# SCHOOL DISTRICT NO. 71 (COMOX VALLEY)

## POLICY MANUAL

POLICY:	8024
Date:	September 16, 1980
Revision:	0

### Safety Procedures on School District Maintenance Vehicles

The Board of School Trustees requires that all School District owned maintenance trucks shall be equipped with safety cones. All School District personnel shall, when operating these vehicles, be required to "Circle Check" his or her vehicle before it is entered and moved.

The purpose of this safety procedure is to help prevent accidents by ensuring that the School district employee-driver is aware of all hazards prior to moving a vehicle.

Detailed procedures with respect to this program are as per the approved regulations authorized under this policy.
